

GUIDING PRINCIPLES

Our Guiding Principles are the basis for our daily activities. At the end of our common journey, our students should leave the Deutsche Schule Toulouse as cosmopolitan Europeans and be empowered to help shape the Europe of tomorrow.

COMMUNITY

We live in a school community where interaction and cooperation are characterised by trust and mutual respect. We see ourselves as a school for all and try to ensure the participation of all. We see diversity as an enrichment and an opportunity. We strengthen our sense of unity through numerous joint sporting and cultural activities. Each individual (students, teachers, staff, parents, board) sees themselves as part of this community.

PERSONAL DEVELOPMENT

We support our students in developing their personalities and their individual strengths in a self-determined way. The education of responsibility, tolerance and open-mindedness as well as the readiness to get engaged in society are especially important to us.

ACQUISITION OF COMPETENCES

We enable our students to learn autonomously and to use the media consciously. We support developing their professional, methodical and social competences. In addition, they acquire through regular and creative exchange with our French and international environment foreign language and intercultural skills. Our school offers a high-quality language education with the special opportunity to achieve an outstanding level in German, English and French.

EDUCATION

We are a recognised school abroad and regard the seal of quality "Excellent School Abroad" at all times as an incentive and an obligation. For us, this means high-quality education based on a broad range of subjects. Our students can achieve all the qualifications of the German general education system, and the school-leaving examination entitles them to study anywhere in the world. We actively and specifically support our students in their choice of profession and studies. We take the constantly changing world into account by actively and sustainably developing our school.

ENCOUNTERS

We maintain a good working relationship with our local partner schools, the international Lycée Victor Hugo, the École Primaire Lucie Aubrac and the International School of Toulouse, which is lived out on a daily basis. It is a special concern of ours to build bridges between cultures.
